

Bulletin – New Zealand. Covid

We have been notified of the following from our office in New Zealand.

NZ is now adapting to the Omicron surge that we all expected. This has come quite late to NZ due to our previous Covid restrictions. We are getting 25k reported cases per day now but it is probably double that in reality. That's the equivalent of 300k reported daily cases in the UK based in population. The net result is that a high proportion of the work force are Isolating at any one time and this is effecting all our Delivery Partners significantly. NZ is expected to peak in about 3 – 4 weeks so we expect this to get worse.

Revised Transit Times

Auckland areas: Up to 7 working days' delay.

Other parts of the country: Up to 5 working days' delay.

We will continue to monitor the situation and report any changes regularly
