

New Zealand – Weather update impact on services – 23rd February

WEATHER BULLETIN

As a direct result of the Cyclone and other weather events we are having serious delays getting freight to the South Island. 90% of all Courier traffic travels via Inter-Island ferries but several are still out of commission. Please expect delays of up to 4 days.

In the North Island, especially Napier / Hastings / Gisborne and the greater Hawkes Bay region, we are still seeing significant delays but these should start to ease by next week.

All of this activity does have an effect on the network in general.

We will continue to update you as we receive further updates and hope to be back to normal service soon. If you require any further assistance, please email our cs team:- cs@skynetworldwide.com
