

## HONG KONG – TYPHOON NALGAE

2<sup>nd</sup> NOVEMBER 2022

Please be advised of the following information received from our office in Hong Kong which is still on course to cause delays in deliveries.

***Hong Kong's No 8-typhoon signal will be in force until at least 10pm Wednesday but whether the third-highest storm alert, the first to be issued in November in 50 years, remains up depends on how much Severe Tropical Storm Nalgae weakens as it travels northwest through the South China Sea.***

***The Hong Kong Observatory on Wednesday said Nalgae, which means wings in Korean, would be about 150km to the south of the city by night.***

***"Rainbands associated with Nalgae will affect the vicinity of the Pearl River estuary," the Observatory said, as it reminded the public to stay away from the shoreline. "Showers over the territory are expected to become more frequent later today. Seas are very rough with swells.***

Typhoon Nalgae has forced ferry services to remain suspended. Roads may be flooded which would delay deliveries. Please expect delays. We will keep you updated as we receive more information.
